NEW & IMPROVED Estroven® Nighttime

Product

Description:

New & Improved Estroven® Nighttime -- now available in retailers nationwide -- provides safe, multi-symptom menopause relief from hot flashes and night sweats, plus occasional sleeplessness.* Estroven Nighttime's formula has been enhanced to better deliver on its core benefit of helping women sleep, which is one of the most prevalent and bothersome symptoms for peri-menopausal and menopausal women.*

Estroven Nighttime now contains Melatonin, a clinically proven ingredient found in sleep aids which helps women fall asleep easier.* In addition, Estroven Nighttime was strengthened with clinically-proven Soy Isoflavones to more effectively reduce night sweats and hot flashes.* When taken as part of a nightly regimen, the proprietary blend of herbal ingredients helps women have a restful night's sleep and wake up refreshed again.*

Ingredients:

In addition to clinically proven Melatonin and Soy Isoflavones, Estroven Nighttime contains an Estroven Herbal Sleep & Relaxation Blend with chamomile, passion flower and valerian and hops.

Suggested Retail: \$10.99 for 24 caplets

Suggested Use: Take one caplet before bedtime. For best results, nightly use is important.

Some women may notice benefits in 7 to 10 days, but because Estroven contains many natural ingredients it may take a few weeks to work in harmony with your body. Most ongoing benefits are realized within 30-60 days of continuous daily use.

Website: <http://estroven.com/>

Where to Find It: Estroven Nighttime is available nationwide at CVS, Rite Aid, Target, Walgreens, Wal-Mart and other major drug and food retailers, and online at drugstore.com.

Estroven is also available in additional formulas including Maximum Strength, Energy and Mood & Memory.
