

QUESTIONS FOR YOUR ORTHODONTIST

During your orthodontic consultation, you will discuss many things, and it may be easy to forget some of the questions you or your teen wanted to ask. Before making a decision on braces, consider Invisalign Teen® as a clear and removable alternative to traditional wire and brackets.

Here's a list of some of the most common questions to bring with you, so you have all the information you need to agree on the best teeth straightening option for your child.

PARENTS

- What are the different teeth straightening options you prescribe?
- How much experience do you have with Invisalign®?
- With my teen's case, about how long will treatment last?
- Can you show me how my teen's teeth will shift and what the final result will look like?
- How much will it cost, and are there payment options?
- I'm afraid my teen might lose or break an aligner. How much extra will this cost me?
- How do I know that my teen is wearing the aligners as recommended/prescribed?
- In your opinion, what are the differences between traditional metal braces and Invisalign Teen®?
- Please explain the Invisalign® treatment process as it compares to braces. How does it move my teen's teeth?
- How often will we have to visit your office?
- How does Invisalign® fit into my teen's life in terms of eating, school, sports, and other activities?
- My teen doesn't have all of his/her permanent teeth yet. How does Invisalign® work with this case?
- What happens after Invisalign® treatment is done? Will my teen need to wear a retainer? Why are Vivera® retainers the best retention option for my teen?

TEENS

- Will my treatment be painful?
- Is there anything that I am not allowed to eat?
- How long will my treatment last?
- What happens if I forget to wear my aligners?
- Can I still play sports or a musical instrument while wearing the aligners?
- Will wearing Invisalign® aligners affect my speech?
- What happens if I break or lose an aligner? How much will that cost my parents?

REMEMBER: As with any medical opinion or procedure, it's always good to get a second opinion, especially if your teen is told that they are not a candidate for Invisalign®. If you want to explore Invisalign Teen® as an alternative to metal braces, be sure to locate an experienced Invisalign Teen® provider at www.invisalignteen.com
